ABDUL GHANI AFAQ

Business Analyst | Product Owner (Transitioning) | Project Management Professional
ghaniabdul712@gmail.com | LinkedIn | New Delhi, India

PROFESSIONAL SUMMARY

Business Analyst and Project/Product Management professional with 3+ years of experience delivering complex web and mobile products across Insurance, E-Learning, and HR Tech domains. Proven expertise in requirement elicitation, stakeholder management, Agile/Scrum facilitation, and cross-functional team coordination — contributing to 4+ successful product launches across global clients. Currently transitioning into a Product Owner role with hands-on experience in product backlog management, sprint planning, user story development, and roadmap execution. Proficient in Jira, Confluence, GitLab, and MySQL, with additional exposure to pre-sales operations including RFP management and client engagement.

CORE COMPETENCIES

- Product Roadmapping & Strategy
- Requirement Elicitation & Analysis
- BRD / FRD / User Stories
- Gap Analysis & Process Improvement
- Agile / Scrum & Sprint Planning
- User Journey Mapping & Wireframing
- UAT & Regression Testing
- Business Analysis
- Backlog Grooming & Prioritization
- Cross-Functional Team Leadership
- Stakeholder & Client Engagement
- Data Analysis & Reporting

TECHNICAL SKILLS

BA & PM Tools	Jira, Confluence, MS Visio, Figma, Miro, Trello, Asana
Methodologies	Agile, Scrum, Kanban, Waterfall
Documentation	BRD, FRD, User Stories, Release Notes, Use Case Docs, Process Flow Diagrams
Automation / Dev	Jenkins (CI/CD basics), GitLab, GitHub
Data & Analytics	MySQL, Excel (Pivot Tables, VLOOKUP, Dashboards), Tableau (basic), Python (basic)
Productivity	Microsoft Office Suite (Expert), Google Workspace (Advanced), Slack
Domains	Insurance, E-Learning, HR Tech, Financial Services, AI-driven Platforms

PROFESSIONAL EXPERIENCE

Associate Product Manager

ABM Technologies & Consultancy Inc | Delaware, United States — *Jun 2026 – Nov 2026*

Domain: US Higher Education SaaS | AI / RAG Platforms | Digital Accessibility Compliance

- Managed end to end product lifecycle activities across cross-functional engineering, UX/UI design, and QA teams, orchestrating Agile/Scrum ceremonies and aligning business goals with C-suite and client stakeholders.
- Led business analysis for two higher-education SaaS products — KORA AI (an AI chatbot platform) and EDRO (a digital accessibility compliance platform) — owning requirements end to end and running both backlogs in Jira from first ticket through to production.
- Authored comprehensive user stories, acceptance criteria, and technical tasks in Jira across multiple epics for both products, eliminating requirement ambiguity and reducing engineering rework.
- Worked on core product documentation, including BRDs, user stories, and release notes, while synthesizing 5 disparate sources into a unified feature specification that surfaced 7 pivotal strategic decisions for executive leadership.
- Built and maintained a 12-month product roadmap for the product, iterating directly with engineering to keep scope and priorities realistic sprint over sprint.
- Defined requirements and screen flows for the PDF remediation workspace, mapped a 10-gate accessibility pipeline aligned with ADA/WCAG standards, evaluated accessibility vendors (Allyant, Equidox, Rev, Verbit, Kaltura, 3Play, Amara), and delivered go-to-market materials including competitor analysis, market sizing (~$250M TAM), and pitch decks.

Manager – Pre-Sales & Operations | Transitioning Product Owner

ABM Technologies & Consultancy Inc | Delaware, United States *Jan 2026 – May 2026*

Domain: LMS, CMS, Web Development Products

- Collaborated with technical, design, and delivery teams to validate product feasibility, define solution scope, and keep proposals accurate and competitive — bridging business needs and product delivery.
- Took ownership of backlog management, requirement documentation, and cross-functional coordination while transitioning into a Product Owner capacity.
- Oversaw end-to-end RFP/RFQ cycles for LMS, CMS, and web development products, improving pipeline efficiency by ~10% month-over-month.

Consultant – Pre-Sales

ABM Technologies & Consultancy Inc | Delaware, United States *Oct 2025 – Dec 2025*

- Owned the full pre-sales cycle — from qualification and requirement discussions to solution structuring and on-time RFP/RFQ submissions; recognized as Employee of the Month for bid management and client engagement.

Business Analyst & Project Coordinator

InnovationM *Oct 2024 – Apr 2025*

Domain: HR Tech | AI-Driven Candidate Assessment Platforms

- Facilitated daily Scrum stand-ups and sprint ceremonies for a cross-functional 10-member development team, tracking progress across 6+ active sprints and maintaining consistent on-time delivery.
- Gathered, analyzed, and documented 40+ business requirements through stakeholder interviews and workshops, translating them into detailed FRDs and user stories for 2 concurrent products.
- Developed and maintained project status dashboards, roadmaps, and weekly stakeholder reports, enabling data-driven decision-making across client and internal review meetings.
- Managed cross-functional coordination between design, development, and QA teams using MoSCoW prioritization to resolve scope conflicts and reduce delivery bottlenecks.

Key Projects:

- FoxMatrix (HR Platform): AI-powered candidate assessment and outsourced technical interview platform. Tech: ReactJS, Java, Python, Node.js, Android.

PMO Analyst

SYMB Technologies Pvt Ltd. *Aug 2024 – Sep 2024*

- Monitored progress of 5+ concurrent projects, tracking timelines, resource utilization, and performance metrics to ensure on-time delivery.
- Analyzed budget variances and flagged at-risk project milestones, supporting strategic re-prioritization to maintain project momentum.
- Collaborated with cross-functional project leads to ensure deliverables met quality benchmarks and client expectations.

Business Analyst

SYMB Technologies Pvt Ltd. *May 2023 – Jul 2024*

Domain: Insurance (Nigeria Market) | E-Learning | RPA Automation

- Elicited and documented business requirements for 3 simultaneous products; conducted 50+ stakeholder calls across 14 months, maintaining 95% on-time status reporting.
- Translated complex business requirements into technical specifications, user stories, and design documentation for development teams across Insurance and E-Learning platforms.
- Led business analysis for an RPA initiative (UiPath) automating AP invoice processing for a mid-sized financial services client, reducing manual effort across 500+ monthly transactions.
- Analyzed workflow data to identify process improvement opportunities, contributing to a 20% reduction in manual processing steps across onboarding workflows.

Key Projects:

- Ombrella Insure (Nigeria Insurance Aggregator): Full-stack insurance aggregator platform. Tech: Flask, Python, PostgreSQL.
- Aceplus E-Learning Platform: Interactive English learning app with games and quizzes. Tech: Unity, Flask, Next.js, React.js, FastAPI.

EDUCATION

B.Tech in Computer Science & Engineering *May 2019 – May 2023*

Jamia Hamdard, New Delhi, India | Relevant Coursework: Business Systems Analysis, Database Management, Software Engineering
